

ANNUAL REPORT
OF
THE MINES BRANCH
OF THE
Department of Lands and Mines
OF THE
PROVINCE OF ALBERTA

1943

EDMONTON:
A. SHNITKA, KING'S PRINTER
1943

Edmonton, Alberta,
February 26, 1944.

TO THE HON. N. E. TANNER,
Minister of Lands and Mines.

SIR:

I herewith submit the report of The Mines Branch for the year ending December 31, 1943.

Respectfully submitted,

A. A. MILLAR,
Chief Inspector of Mines.

ANNUAL REPORT OF THE MINES BRANCH FOR THE YEAR ENDING DECEMBER 31st, 1943

(ANDREW A. MILLAR, *Chief Inspector*)

The output of coal produced from mines in the Province during the year was 7,677,982 tons, with a valuation of \$22,624,410, this being the second highest tonnage produced in the history of the Province.

The disposition of coal during the year was as follows:

	Tons
Sold for consumption in Alberta	1,560,212
Sold for consumption in other Provinces	2,998,379
Sold to the United States	414,627
Sold to railroad companies	2,098,535
Used making briquettes	208,807
Used making coke	101,132
Used under colliery boilers	173,294
Used by colliery railroads	6,444
Put to stock	16,744
Put to waste	134,140

The above tonnages include coal lifted from stock and waste heaps, which is not included in the total output.

During the year, 3 shale pits produced 30,432 tons of shale and clay, from which 11,537,802 bricks and 3,500 tons of hollow tile were made.

There were 206 mines producing coal during the year, of which 27 were opened, 22 re-opened, 17 abandoned, and 27 closed. At December 31st, 1943, 180 mines were in operation.

The number of men employed during the month of December was 8,636, this being 493 less than for the corresponding month of 1942.

During the year, 341 miners were granted certificates, 97 of which were Class A and 244 Class B certificates. Due to the shortage of miners, an Order in Council was passed by the Provincial Government in June authorizing the continuation of the granting of Emergency Coal Miners' Certificates to men with limited mining experience. This Order applies to the bituminous and sub-bituminous mines, as well as the domestic.

To December 31st, 587 of these certificates were issued, and while not altogether satisfactory, they gave considerable help to the mines when same was most needed.

Samples of mine air were taken during the year by the Inspectors and sent to the Chemistry Branch of the Department of Mines, Ottawa, for analysis. This has been done in addition to tests made with the M.S.A. Methane and other gas detectors.

Samples of coal were collected and forwarded to the Industrial Research Council, University of Alberta, for analysis.

All fatal and serious accidents have been investigated by the Inspectors, who also attended the inquests held in their districts, this being in addition to the regular inspection of the mines. All complaints made to the Department were also investigated.

There were 23 prosecutions instituted for contraventions of The Mines Act, made up as follows: 1 operator and overman, 3 overmen, 1 coal buckler, 2 examiners' (three charges), 1 general manager, 1 locomotive driver, 7 miners, 1 hoistman, 3 timber packers, 1 timberman, 1 mine manager.

The protective equipment reported to us as being in use is as follows: 3,485 hard hats, 2,146 pairs of safety shoes, 352 pairs of goggles, 35 pairs of knee caps, 81 respirators.

The purchased electrical power by the mines was 41,491,378 k.w. hours, this being very little less than that used for 1942.

During the year, all the electrical plants and equipment at the mines were inspected, and at the end of 1943 there were 74 mines that were electrified, and in addition, 7 mines have electric mine lamps, signals or telephones.

The following mines were electrified during the year: Red Hot Coal Co., Ltd., Edmonton; Edmonton Collieries, Ltd., Edmonton; Riverdale Coal Co., Ltd., Carbondale; Samis Collieries, Namao; Jasper Coals, Ltd., Drinnan; Sovereign Coal Co., Ltd., Wayne; Camrose Collieries, Ltd., Ohaton; Castor Creek Collieries, Ltd., Castor; Arcadia Coal Mines, Ltd., Willow Creek.

On January 6th, fire destroyed the tippie of the Great West Coal Co., Ltd., mine at Clover Bar. A new tippie has since been erected with the necessary screening arrangements, to handle the entire output.

Of the new installations, the Jasper Coals, Ltd., Drinnan, is most extensive, and the following are the particulars: Above ground—1, 75 K.V.A. 2,300 volt steam driven generator, driven by 120 H.P. McEwan engine, exciter 10 kw.; 3, 15-K.V.A. transformers, 2,300 to 220 volts; 2, 10-K.V.A. transformers, 2,300 to 220-110 volts; 1 pump with 15 H.P. 220 volt motor, magnetic starter; underground—1 blower fan with 2, H.P. 220 volt motor; 1, 15-H.P. 220 volt Sullivan coal cutter.

The following installations have also been made:

Arcadia Coal Mines, Ltd., Willow Creek—Above ground: 2, 50-K.V.A. transformers, 13,200 to 200 volts; 1 hoist with 10 H.P. 220 volt motor; 1 fan with 10 H.P. 220 volt motor; underground: 2 Mavor & Coulson coal cutters, each 50 H.P. 200 volt.

Sovereign Coal Co., Ltd. Wayne—Above ground: 3, 25-K.V.A. transformers, 2,300 to 220 volts; hoist, 40 H.P. 220 volt motor; fan, 5 H.P. 220 volt motor; underground: 1 Sullivan coal cutter, 30 H.P. 220 volt; 1 pump with 5 H.P. 220 volt motor.

Midland Coal Mining Co., Ltd., Drumheller—Above ground: 3, 75-K.V.A. transformers, 2,300 to 460-230 volts; underground: 1 Mancha 6-ton United States Bureau of Mines Approved battery locomotive with Exide batteries; 1 Hertner electric motor generator set, 7.5 K.W. capacity, driving end 15 H.P. 440 volt A.C., equipped with Hertner automatic panel.

Commander Coal Co., Drumheller—Above ground: Hoist with 300 H.P. 2,300 volt motor, Lilly control and full magnetic accelerating panel; aerial hoist with 22 H.P. 220 volt motor, drum control; hoist with 15 H.P. 220 volt motor, drum control; tippie: 1, 20-H.P. 220 volt motor, push button magnetic control; 2, 15-H.P. 220 volt

motors, push button magnetic control; 3, 150-K.V.A. transformers, 13,200 to 2,300 volts; 3, 75-K.V.A. transformers, 13,200 to 2,300 volts; under ground; 1, 50-K.V.A. 2,300 to 220 volt 3-phase Pyranol transformer; 1 motor generator set for charging batteries, 15 H.P. motor 220 volts and a 8.5 Kw. generator with automatic charging panel; 1 Mancha battery locomotive, U.S. Bureau of Mines Approved.

Some strikes of a local nature have taken place during the year, and one general strike occurred on November 1st and lasted until November 8th, although some mines stayed out a few days longer.

The strike was over a demand for an increase in wages, and the questions at issue were dealt with by a Commission sitting under Mr. Justice O'Connor.

I regret to report that the number of fatal accidents for the year was 25, and this compares with 17 in 1942.

Three accidents occurred which caused the death of more than one person. One was an explosion at the Kerralta Mine, Lethbridge, on August 9th, and as a result four men, including the overman and mine electrician, were killed.

Repairs were being carried out on an electric coal-cutting machine, but the electric power appeared to have been off at the machine at the time of the explosion.

The point of origin evidently was at the face of the room where the machine was. The overman and the electrician were found afterwards to have had smoking material and matches on their person.

The explosion occurred on a Monday, and it was found that the mine fan had been standing over the week-end and was only started before the men went on shift. No inspection previous to the men going in the mine had been made.

Explosive gas was found in the mine after the explosion, and it was clearly caused by methane gas.

On July 16th, two men, a fireboss and a miner, were asphyxiated by gas in No. 8 Panel, West Side workings, of the Cadomin Mine, which was given off by a bump. They had gone into a place to get some tools and were caught by the gas before they could get out. A large volume of gas was liberated on this occasion.

On October 18th, two miners were killed in the McGillivray Creek Mine, Coleman, by a fall of rock while engaged extracting pillars. A very large cave occurred, and it was some considerable time before the body of one of the men was recovered.

The problems of the industry have increased during the year, due to shortage of labour and materials.

It is also noticeable that some mines are short of certificated officials, and powers may have to be obtained by the Minister to grant provisionals in order to meet the situation.

The Emergency Miners' Certificates appear to be working satisfactorily, and very little difficulty has been experienced by the Department with them.

During the year, Mr. William Goodwin resigned his position as District Inspector of Mines at Edson, and was succeeded by Mr. Alex. Muir, who was previously manager at the Alexo Mine.

Many changes of the leading officials have also occurred at the various mines during the year.

Many plant changes and additions have also been made at the various mines, some of them at the suggestion of the Emergency Fuel Production Board.

One new operation has been started at Drinnan by the Jasper Coals, Ltd., near the old Jasper Coal Mine location. A slope has been sunk about 400 feet in a seam four feet thick, pitching eight degrees. The roof is a firm sandstone. It is intended to work the seam longwall, using electric machines and face conveyors.

While new mine openings are being made at Cadomin, Luscar and other places, and there is an effort being made by the underground mines to meet the demand for more production by plant additions and in other ways, the lack of experienced miners has restricted their efforts in this direction.

Much has been done to meet the demand for greater coal production by starting up new stripping mines. Considerable tonnages of coal have been stripped and are available, and no doubt more would have been shipped, but in a number of cases the loading ramps or tipples have not been completed, but are in all cases now about ready for operation. Some of the most important of these strip operations are herewith noted:

Camrose Collieries, Ltd., Camrose, located on Section 29-46-19-4. Seam about $4\frac{1}{2}$ feet thick, the average cover being about 20 feet. Camp buildings have been erected, with hot and cold running water throughout, and centrally heated.

A tipple with scales, etc., has been installed, capable of handling 100 tons per hour, and a road has been gravelled from the pit to the tipple. A considerable tonnage of coal has been stripped at this mine.

Near Castor, the Castor Creek Collieries, Ltd., has started a strip pit on Section 3-38-14-4, and the seam averages about $4\frac{1}{2}$ feet in thickness. The cover is variable, but does not appear to average more than 20 feet over a considerable area.

Camp buildings and other plant is being installed, and also a tipple to handle 100 tons per hour. This mine is likely to become a large producer.

In the Tofield area, an increase in the tonnage stripped is being provided by the Dodds Coal Mine, which is now controlled by E. Skarin and associates, of Edmonton.

Near Ardley, Foreman and several other points, stripping operations on a small scale are being carried on, while previously existing strip pits have been making provision for increasing their outputs.

In the Taber area, the Majestic Mines, Ltd., is operating on Section 12-10-17-4, and a considerable tonnage of coal has been stripped and is waiting shipment, the tipple not yet being ready.

The Western Ventures, Ltd., are also operating along similar lines on the Taber seam, which runs from 3 to 4 feet thick.

Edward Oliver has also stripped several thousand tons. The cover ranges from very light to about 30 feet.

At Grassy Lake, a company under the name of the Continental Coal Corporation, Ltd., has been stripping on the property formerly operated by Victor W. Campbell, and also that of A.A.A. Coals, Ltd., close to the Campbell property.

Once loading facilities are available, a substantial tonnage of coal is going to be obtained from the stripping operations in the Taber district.

West of Edmonton, the Pembina Coal Mine has been taken over by Willson and Andrews, and some tonnage has been stripped, but it is their intention to also operate the underground mine. The stripping is on the Evansburg seam.

The Wilma Coal Co. is doing some stripping on the south side of Lake Wabamun, but the location may limit the tonnage produced. The seam is the big Wabamun seam.

In the Drumheller district, considerable additions to the plants and equipment have been made, but the most important is the near completion of the construction programme that has been carried on at the Commander Mine. An up-to-date plant has been installed for the preparation of domestic coal. This mine should, from now on, become a larger producer if labour can be obtained.

At Nordegg, the Brazeau Collieries, Ltd., has installed a new briquetting unit, and in No. 2 seam some air picks have been introduced.

Three underground fires occurred in mines during the year, but all were brought under control without serious dislocation of work at any of them.

ANNUAL PRODUCTION OF COAL FROM MINES IN THE PROVINCE OF ALBERTA

The following table is taken from a report prepared by the Dominion Bureau of Statistics and published in "Coal Statistics for Canada" for the year 1942:

*The sum of Canadian coal-mine sales, colliery consumption, and coal supplied to employees, and coal used in making coke, etc., less the tonnage of coal exported.

†Includes small tonnages from countries other than Great Britain and the United States. Deductions have been made to take account of foreign coal re-exported from Canada and bituminous coal ex-warehoused for ships' stores.

THE MINES BRANCH

The following table shows the quantity of coke imported into Canada during the years 1941, 1942 and 1943 through ports in the Provinces, compiled from information from the Dominion Bureau of Statistics:

PARTICULARS OF WORK DONE IN SHALE MINES IN THE PROVINCE DURING 1943:

Output of shale (in tons) used making bricks	30,432
Output of shale (in tons) making hollow tile	3,500
Number of shifts worked	17,073
Average number of men employed	61
Explosives used (pounds), 40% dynamite	30,791
Explosives used (pounds), monobel	950
Number shots fired using fuse	14,348
Number of shots fired using electric detonators	1,950
Total number of bricks made	11,360,077
Total number of bricks put to stock	67,503
Total number of bricks lifted from stock	245,228
Bricks sold for use in:	
Alberta	5,548,465
British Columbia	1,584,301
Saskatchewan	2,371,621
Manitoba	1,905,461
Ontario	127,954
Total	11,537,802
Hollow tile made (tons)	3,500
Hollow tile put to stock	
Hollow tile sold	4,567
Hollow tile lifted from stock	1,067

PARTICULARS OF WORK DONE BY FARMERS STRIPPING COAL UNDER DOMESTIC PERMIT

Tonnage	263
No. of days worked during the year	99
Number of men employed during the year	44
Total number of shifts worked	129
Total number of permits issued	31
Total number of permits used	18

The above coal was stripped for domestic use only, and not for sale.

*Includes output from Alberta and Saskatchewan. Previous to 1922 sub-bituminous was included in bituminous coal.

During the year 1909 a strike affecting all the larger mines in the Province, lasted for a period of three months.
During the year 1911 a strike affecting all the larger mines in the Province, lasted for a period of eight months.
During the year 1917 a strike affecting all the larger mines in the Province, lasted for a period of three months.
During the year 1919 a strike affecting all the larger mines in the Province, lasted for a period of three months.
During the year 1922 a strike affecting all the larger mines in the Province, lasted for a period of five months.
During the year 1924 a strike affecting all the larger mines in the Province, lasted for a period of six and one-half months.

NOTE.—The table showing the number of men employed in the Anthracite Coal Field, includes employees at the briquetting plant. There has been no anthracite coal produced since 1923.

*Calculating the total per capita production for men employed underground, the tonnage mined from stripping pits was deducted and only the tonnage produced from mines was used.

It will also be noted that the tonnage used in the above and following tables does not include tonnage extracted under permit.

ELECTRICITY

The rules for the installation and use of electricity in or about mines requires a return to be made to the Department on or before January 15th of each year, giving size, type and any other particulars which may be required of electrical apparatus in use above and below ground. According to the return received from the different mines, electricity was used in 69 different mines in 1943. A summary of these returns regarding the horse-power of electrical apparatus in use is given below.
